Course Subjects & Descriptions for Skills Certificate: International Trade and Transportation

LOGISTICS:

102 Concepts in Global Logistics

(2 Unit: CSU) Lecture, 2 hour)

This course introduces the technology that is used within global logistics. The emphasis is on state-of-the-art Technologies and practices found within the mobile workforce and dynamic work site environments that enable global commerce. Topics include handheld devices used in sales, inventory, and real-time tracking, GIS (Geographic Information Systems) used in distribution, GPS (Global Positioning Satellites) used in transportation, an introduction to global value networks, and a survey of global supply chain logistics careers.

103 Inventory in Global Logistics

(2 Unit: CSU) Lecture, 2 hour)

This course introduces basic records and inventory management principles, practices, and software applications that support global supply chain logistics. The course teaches standard inventory concepts, procedures, and technologies that are used to maintain Records Information Management systems that sustain global manufacturers, distribution centers, wholesale suppliers, retail networks, and transportation industries.

INTERNATIONAL BUSINESS

1 International Trade

(3 Unit: CSU) Lecture, 3 hour)

This foundation course in international trade provides a global Logistics and international marketing perspective to importing and exporting. From world trade agreements and regulations to practices and procedures, the course surveys the global business environment, international supply chain management, international market entry, international contracts, terms of trade, terms of payment, currency of payment, documentation, U.S. Customs, and competitive advantage strategies.

2 Transports Systems

(3 Unit: CSU) Lecture, 3 hour)

This course examines the global transport systems used in importing and exporting. Emphasis is given to the role of ocean, air, land, and multi-modal transport infrastructures as key components of international supply chain management operations. Supporting international trade topics include commercial terms of trade, commercial and transportation documents, insurance, packaging for export, Logistics infrastructure and security, and United States Customs clearance.
